

"WinEst, once again, enabled us to blow away the competition.

In the two projects we just won, our presentation of the numbers, and the quantity and quality and information that WinEst enabled us to present, made the other guys look like amateurs. Of course, this has been true as long as I have been using WinEst; **it has always helped us outclass the competition.** Neither the economy nor the federal government could have helped us to turn things around, but WinEst did."

"WinEst is the best! I am very happy with it; it is so easy to use and so powerful; it makes my life easier in these tight times. I have recommended it to several builders recently, and can't wait to fully customize it. When I first asked (Account Manager Dulles Alexander) what the most powerful feature of WinEst was, he said it was the filters -- and he was right.

I can view my estimates any way I want. The filter customizations are endless, and I am always just one click away from another view. I see it the way I want. This saves errors, omissions and time. In this market, WinEst has helped me survive."

I just wanted to thank WinEst for the excellent training that we got last week. Doug was absolutely perfect for the training; he knew the system in and out and had a very pleasant personality to deal with a group. He is an unbelievable slave driver. He made the whole team work from 8 a.m. to the end of the day. He wore out the team by Friday afternoon. Way to go, Doug!
Your support staff is also fantastic and I feel great with my recommendation to choose WinEst over the others. Thanks again!
