

WinEst Pro estimating software enables you to quickly and easily create, manage and integrate detailed project estimates. WinEst Pro uses cost-knowledge management to increase your project productivity and customize your essential documents. The user-friendly workspace interface simplifies estimating, cost information gathering, bidding and buying. Save time, avoid errors and integrate essential project processes for optimum efficiency—all with WinEst Pro.

The **Estimate History** or **Audit Trail** feature provides a detailed item-by-item history of every change made. WinEst Pro also tracks changes made to an estimate with the **Estimate File History** feature.

WinEst Pro's built-in tools for changing estimate values include the ability to modify individual cells and columns—as well as global modifications to the entire estimate.

Rely on WinEst to deliver the features, power and customization you need.

Unleash virtual access to your valuable cost data—the most critical ingredient in a professionally executed estimate. WinEst Pro gives you the power to produce intelligent, high-quality estimates accurately, efficiently and with true professional-grade tools.

Fully Customizable Toolbar & Menus — put your most frequently used processes at your fingertips for optimum efficiency.

Master Assemblies — assemblies can now be driven by other sub-assemblies, giving you tailored, precise control.

Database WBS Codes — WBS codes can now be stored in the database. Both standard WBS codes 1-7 and hierarchical WBS codes 8-14 are supported.

Database Search Capability — expanded search functionality includes full Boolean search (*and, or, not*) across all fields.

Item Database — items can be assigned to the user-defined, four-level hierarchy in the database, providing support for CSI Master-Format 2004.

ADDITIONAL WINEST PRO FEATURES

- ▶ More easily log and manage multiple price quotes from subcontractors and suppliers
- ▶ Easily scan your estimate for incomplete items
- ▶ Utilize new markup options, such as tax markups that support international requirements for “tax-on-tax” calculations
- ▶ “Auto-populate” MS Word and MS Excel with your estimate data
- ▶ Easily transfer budgets from your WinEst estimate to your project-management software
