WinEst Pro Plus allows you to easily summarize the estimate based on your company's work breakdown structure. The estimate in this example is summarized by Unifomat.

Unleash virtual access to your valuable cost data—the most critical ingredient in a professionally executed estimate. Pro Plus gives you the power to produce intelligent, high-quality estimates that are more accurate and complete than ever before.

- ▶ More easily log and manage multiple price quotes from subcontractors and suppliers
- ▶ Store both list and sale prices for each material item in the database (price book)—a key pricing option for the manufacturing market segment
- ▶ Query the cost database more quickly by filtering your estimate by every field in an item record
- ▶ Utilize new markup options, such as tax markups that support International requirements for "tax-on-tax" calculations
- ▶ Get the most out of additional spreadsheet views and reporting options
- ▶ Expanded system customization lets you tailor your workflow your way

ADDITIONAL PRO PLUS FEATURES

Fully customizable toolbar & menus — your information is displayed how *you* want to see it

Master Assemblies — assemblies and sub-assemblies can now be driven by other assemblies.

Estimate specific Global Variables — global variable values are shared within the estimate and can be used in assembly or item formulas.

Database Search Capability — expanded browser search functionality includes full Boolean search (*and, or, not*) across all fields.

Item Database — items can be assigned to the user-defined, four-level hierarchy in the database which incorporates CSI MasterFormat 2004.
