

Virtual Takeoff[®]

WinEst Virtual Takeoff is a powerful on-screen estimating takeoff tool which enables you to perform your takeoff directly on your PC screen. With WinEst Virtual Takeoff you can do your takeoff anywhere, anytime.

Go Paperless

- With Virtual Takeoff you can quickly generate your takeoffs directly on your computer using electronic plans.
- WinEst Virtual Takeoff's ease of use and advanced technology allows you to generate your takeoff anytime and anywhere.

Integrate to WinEst Estimating

- Virtual Takeoff is dynamically linked to your WinEst estimate file. Any change you make to your takeoff will automatically be reflected in your estimate.

Manage Your Takeoff

- With Virtual Takeoff you can manage your takeoff through advanced features for greater area and item recognition and comprehensive control.

Multiple Colors

- Color-code your estimate layer items for enhanced recognition and navigation.

Multi-layer support

- Sort and separate your objects on individual layers for enhanced viewing, printing, and presentation capabilities.

Built-in symbol library

- Re-sizable shapes and symbols allows you to track and differentiate between different takeoff items and features.

Input Text during Takeoff

- Annotate the drawing image with your takeoff notes or questions.

Area Fills

- See your completed work with customizable images, fills and colors.

Advanced Plan Navigation and Viewing

- Micro-to-Macro Views Easily view your whole plan or just the minute details.
- Scroll Bars - Easy navigation bars simplify on-screen positioning within your plans.

Variable Sample Views

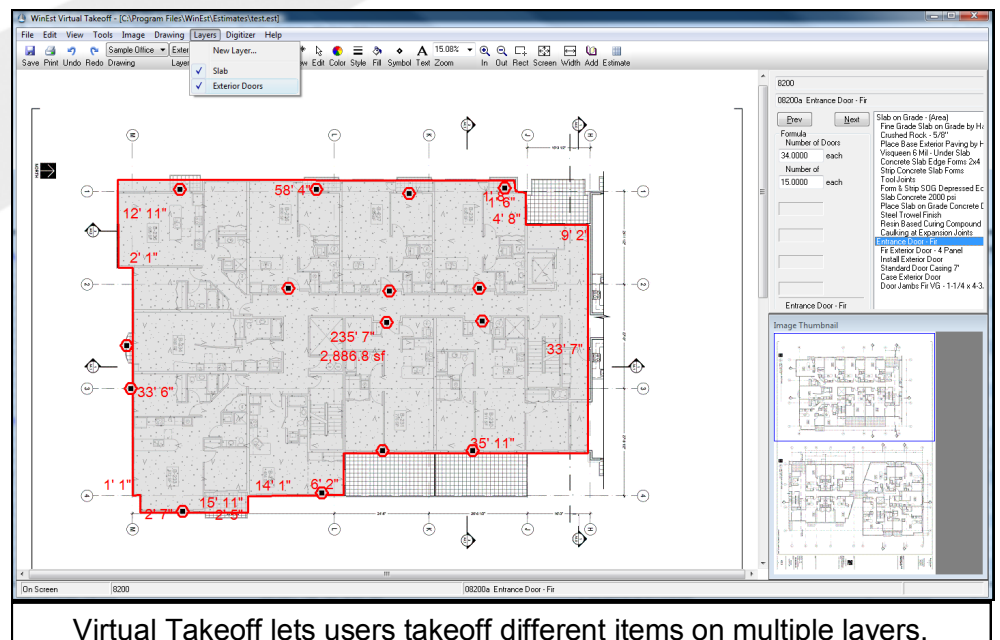

- Plan inversion and brightness controls for easy viewing
- Area and Item Dimensions - View the dimensions of areas, objects, or lines directly on your takeoff.

- Navigable Thumbnails Enable easy navigation, location and place selection

Variable Line Drawing Styles & Colors

Supported Digital Image Files:

.cal, .jpg, .gif, .png, .pdf, .dwg, .bmp, .pvt, .tif, .pln

Virtual Takeoff lets users takeoff different items on multiple layers.
