

WinEstimator, Inc.[®]
Your partner for success

WinEstimator's core products, Pro, Pro Plus and eTeam, offer three cost estimating solutions to better serve your needs

WinEst Pro[®]

WinEst Pro estimating software enables the user to quickly and easily create, manage and integrate detailed project estimates. The user friendly workspace simplifies estimating, cost information gathering, bidding, and buying.

WinEst Pro includes the following feature sets:

Spreadsheet style estimating allows easy customization and greater analytical flexibility

Comprehensive audit trail - precisely track all changes and modifications with item level detail

Multiple document interface - Open up to 16 estimates at a time and easily drag & drop items between multiple estimates

Takeoff

- Item takeoff
- Assembly takeoff
- Powerful item search capabilities

Estimate manipulation

- Materials factor allows variable adjustments to prices by locality
- Customizable filters enhance analysis and reporting

Total page filter editing - Editable filter based totals page for individualized report formatting

Fully customizable toolbar & menus with Microsoft Windows XP theme

Master Assemblies sub-assemblies can now be driven by other assemblies

Global Variables are shared within the estimate and can be used in assembly or item formulas

Item Cost Buildup enables the user to determine the total unit cost of an item based on a variety of individual cost components

Item Database - WinEst supports both the traditional 3 level and an additional optional 4th level hierarchy

Scheduling Tasks - Task lists used for scheduling can now be database stored as well as estimate specific

Web Based Update Delivery checks the WinEst Support center for product updates and updates the users system automatically when selected.

WinEst Pro Plus[®]

WinEst Pro Plus is essential to efficient integrated estimating, cost information gathering, bidding, and buying. Pro Plus also allows customers to take advantage of online eProcurement.

Unleash virtual access to your cost information and create faster and more accurate estimates. Pro Plus will allow you to produce high quality, variable use estimating output.

In addition to Pro features, Pro Plus includes the following feature sets:

File security & access controls help safely accommodate and coordinate multiple estimators.

The linked database option enables the user to set the Labor/Equipment, Subcontractor/Supplier & Markups databases that are appropriate for this item database.

WinEst Pro Plus supports Labor & Equipment, Subcontractor & Supplies and Markups databases.

What-if analysis

- Apply estimate items to base or to one of 704 alternates
- Support alternates types (pending, approved or denied)
- User can select the appropriate mix of alternates for inclusion with the base bid

WinEst eTeam[®]

WinEst eTeam is the professional estimator's solution for efficient project cost estimating teamwork. It is designed for companies where collaborative estimating is important. With WinEst eTeam, estimates can be produced and shared from anywhere, across the hall or across the globe.

**In addition to Pro and Pro Plus features,
eTeam includes the following:**

Collaborative Communication

- Enables multiple estimator teamwork on the same estimate at the same time.

Enterprise Data Manager

Enterprise Data Manager enables the user to organize and manage cost estimate information efficiently in an easy to understand data structure. All information maintained by WinEst Enterprise Data Manager is stored in either Microsoft SQL or Microsoft MSDE.

Enterprise Data Manager enables users to create a variety of project related data types, including projects, sub projects, change orders, estimates, etc.
