

WinEst Microsoft Project Integrator™

WinEst estimating software is an industry leading tool that enables architects, engineering, construction professionals to quickly and easily create accurate and detailed cost estimates.

Utilizing a user-friendly interface featuring a database-driven spreadsheet, WinEst offers the estimator unparalleled power to create estimates and manage projects. With the addition of the WinEstimator Scheduling Integrator, estimators can share information with Microsoft Project.

Generate Microsoft Project schedules based on integrated WinEst estimate file content. Estimators can create WinEst driven projects, tasks, resources, rate tables and resource assignments. Also, estimators can group WinEst information by job cost code or user created task ID and import tasks for assignments from existing Microsoft Project files.

Features:

- Generate Microsoft Project schedules based on integrated WinEst estimate file content.
- Group WinEst items by job cost code or user created and maintained task activity ID.
- Import tasks for assignments from existing Microsoft Project Files.
