

Primavera Project Management Integrator

WinEstimator is an internationally recognized cost estimating software solution provider. WinEst provides a family of powerful, integrated and flexible estimating software solutions for the AEC industry.

Utilizing a user-friendly interface featuring a database-driven spreadsheet, WinEst estimating software offers the estimator unparalleled power to create estimates and manage projects. With the addition of the WinEstimator Scheduling Integrator, estimators can share information with Primavera.

Features

Export Schedule Information to Primavera

- Populates scheduling cost account dictionary
- Creates Work Breakdown Structures – named and coded hierarchical
- Creates required scheduling activities and/or uses existing activities
- Creates required resources & expenses
- Optionally creates labor roles
- Supports Primavera activity constraint types
- Automatically makes cost account

- assignments to resources and expenses
- Creates and links all required resources to activities and activities to WBS
- Automatically loads resources for task based detailed estimating
- Automatically populates task durations
- Advanced cost category mapping

Import Planned Schedule

- Ability to import Activity tables directly into WinEst from Primavera
- Ability to import Hierarchical WBS structures from Primavera
- Preserves Primavera Predecessor relationships during importation

The screenshot displays the WinEstimator software interface with a spreadsheet of cost estimates. The spreadsheet has columns for Item, Description, Takeoff Qty, Unit, Labor Hours, Labor Total, Mat Total, Equip Hours, Equip Total, Subs Total, Other Total, and Grand Total. A dialog box titled 'Export to Primavera' is open, showing fields for 'New project ID' (Sample Buildings), 'New project name' (Sample Office Building), 'Select EPS' (CS-EMEA - Europe, Middle East, Africa), and 'Select WBS' (WBS 8 - Uniform). The dialog also has a checkbox for 'Customize Resource and Expense Assignments' and buttons for 'Help', 'Back', 'Next', and 'Cancel'.

Powerful scheduling integration with Primavera P3e, P5 and P6
